Creative Construction Conference 2017: An invitation

Dear Colleagues and Friends,

Creation is an inspiring endeavor. This is especially true when one creates objects of a size that only a few people can. Cathedrals or skyscrapers, bridges or aqueducts, highways or dams are not only fascinating due to their size but also because they greatly affect the lives of all people in their proximity – for decades or even centuries. Construction...this is a true creation.

The growing demands for a "better" built environment – even if the meaning of "better" is hard to define in this context – requires increasing levels of diverse knowledge. As time progresses, it is getting harder to live up to the ever growing expectations: trains begin to compete with the speed of airplanes, buildings may be expected to produce rather than consume energy, and in the not-so-distant future we will build in outer space, most likely with advanced robotics.

Creative Construction Conferences are organized to provide a forum for those ambitious researchers and practitioners from around the world who have realized that the construction industry is rapidly changing and accept that building materials, construction technologies, and project management will creatively and quickly evolve in the future.

You are cordially invited to participate in our fifth Creative Construction Conference in June, 2017. This year Primošten – a jewel of the Croatian Adria-coast – will play the gracious host of the upcoming Conference.

Time until the conference
358 days

Deadlines

- Submission of abstracts
15 December 2016
- Notification on abstracts' acceptance
31 January 2017
- Extended submission of conference papers
20 March 2017
- Payment of early registration fee
29 March 2017
- Final deadline for hotel reservation
31 March 2017
- Submission of revised papers
30 April 2017
- Cancellation without penalty
15 May 2017
- Submission of extended papers for Procedia
10 July 2017
